TO 3600 MAIL ROOM

Enclosed is a reply in the above-identified application in response to the Office Action dated 3 October 2000.

Please amend the claims as follows. For convenience, attached is a clean copy of the pending claims of this application, as amended.

1. (Thrice Amended) A method for operating a multi-player video game, [said] the method comprising [the steps of]:

enabling [a] each player of multiple players to interact with a gaming environment,

machine-detecting a score and/or performance of each [the] player in a particular session,

backfeeding into the gaming environment a [representation] video image of a currently high-scoring player [said score and/or performance in visual form through an item that identifies the player in question], and

displaying the gaming environment, and the video image of the currently high-scoring player of the multiple players in a prominent location, during the particular session

[said method being characterized by automatically taking up a video image of the player in question as said representation for subsequent video display in said gaming environment, and allowing said player to suppress during said session a presentation of said actual score and/or performance to said backfeeding].
